 YAMARIN

**Where moments  
become memories**

Since 1972

## Then

Over half a century ago, boating was ready for a change. Yamaha outboard engines had already set new standards for quality, reliability and ease of operation. Now they deserved boats to match. Something that would make boating safer, more comfortable and accessible – without losing any of the fun. This thinking gave birth to Yamarin in 1972.

## Now

Today, Yamarin is a premium Nordic boatbuilder carrying on the philosophy of making boating less complicated and more fun. Building sturdy, reliable boats that are equally at home in murky, rocky Baltic waters, in colorful harbors of the

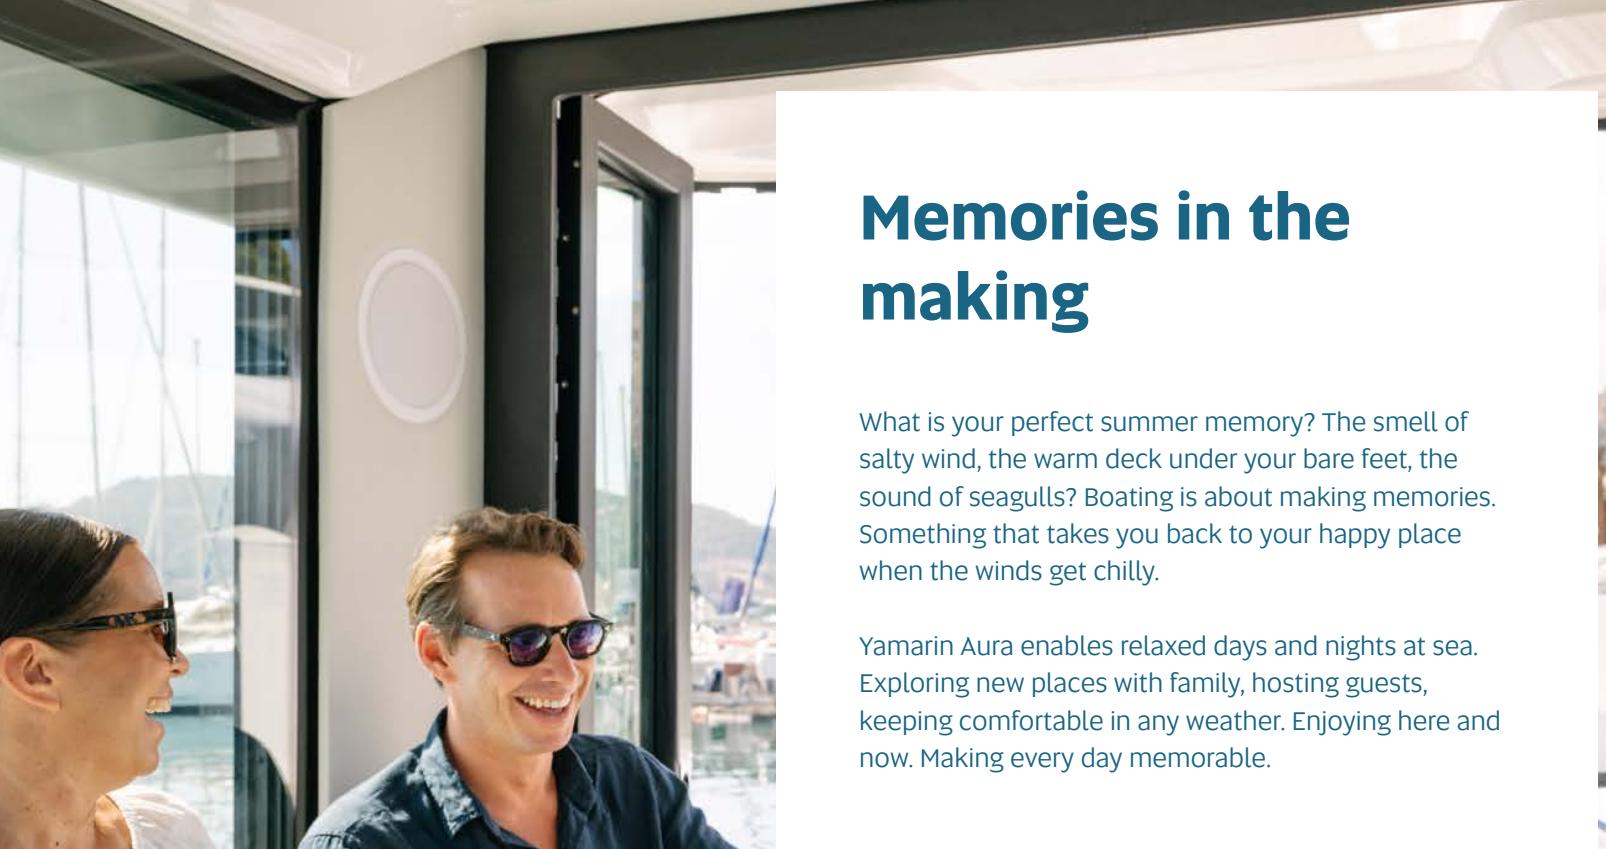

Mediterranean and in the turquoise bays of the Caribbean. Their predictable, understated performance lets you focus what matters the most: making lasting memories together. Enjoying every moment onboard.

## See boating in a new light

Up north, the summer light is liquid magic. Intense, yet seldom harsh during the endless days. By night, the glimmering ripples dissolve into never-ending calm twilight. There is no time – only now. The memory of those timeless moments at sea was the inspiration behind Yamarin Aura, our new flagship boat.

The 33-feet / 10-meter Yamarin Aura has an aura of quality, perfected in the decades of building premium boats with premium materials. More room for the people you care about, steady handling & comfortable overnight trips. Yamarin Aura's bigger size translates into much bigger comfort. It will make you see boating in a whole new light.

## Memories in the making

What is your perfect summer memory? The smell of salty wind, the warm deck under your bare feet, the sound of seagulls? Boating is about making memories. Something that takes you back to your happy place when the winds get chilly.

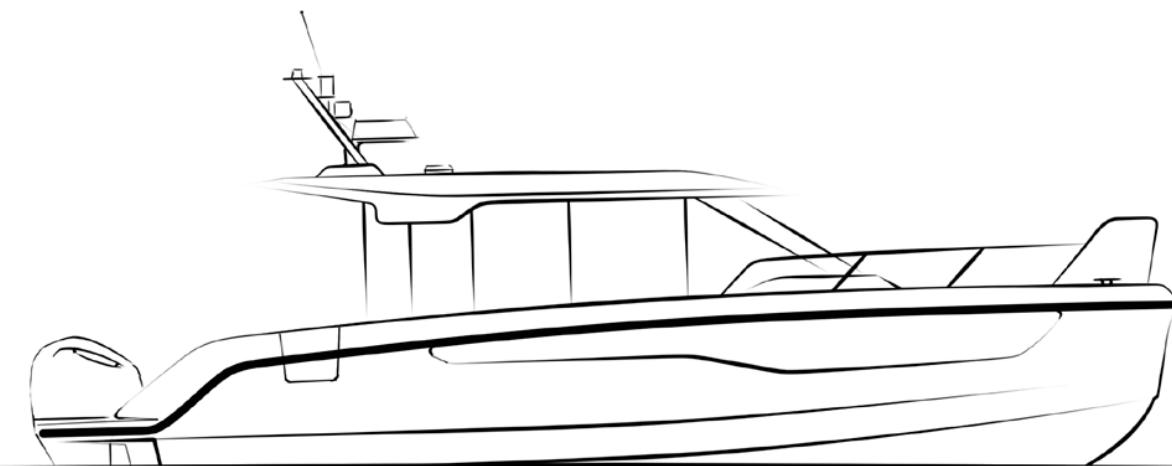

Yamarin Aura enables relaxed days and nights at sea. Exploring new places with family, hosting guests, keeping comfortable in any weather. Enjoying here and now. Making every day memorable.

## A touch of Nordic mindset

The pure, streamlined looks of the new Yamarin Aura is just the beginning. It's the Nordic quality of workmanship and attention to detail that will keep impressing you year after year. The practical touches that show the time, effort and love we put into its design. Yamarin combines the calm Nordic mindset with the warmth and passion of southern seas.

## Technical specifications
